Please share....

- Name
- Year
- The coolest thing you have built over the summer OR your best use of AI this summer

Let's jump right in and create our dev accounts!

If you already have one, please be patient while others sign up.

Sign-up

console.anthropic.com

Find your ORG ID

Click on Settings, under "Your Organization" you'll see an Organization ID. We will use this to distribute API credits!

YOU WIN FREE CLAUDE PRO

It's TRUE, for coming to this meeting, you have earned a free Claude Pro account.

To redeem:

- Fill out the form attached to the QR code
- Make sure you have a Claude.ai log-in that is connected to your **STUDENT EMAIL**

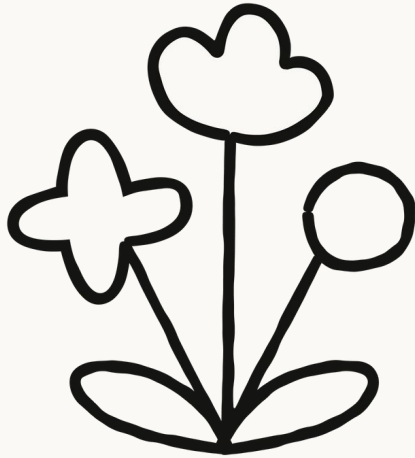

Note to students:

We will send out an email with your FREE Claude Pro login, this will take up to two business days!

What is the CBC?

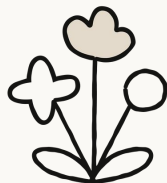

The Claude Builder Club Mission Statement

Claude Builder Clubs are inclusive communities for all students interested in exploring AI development, developing technical skills, and learning about the benefits and risks associated with AI. CBCs are a space for passionate students to build their own projects while connecting with peers who can elevate their ideas. CBC members are AI thought leaders on their campuses and beyond.

- **All are welcome**
 - Anyone can join a CBC, regardless of major or technical ability. Anyone can build!
- **Continuous learners**
 - If you have been making apps for years or have never written a line of code, there is always something to learn.
- **Foster creativity**
 - The CBC gives space for builders to jump in and create solutions using AI for anything that sparks your interest.
- **Fun and engaging community**
 - CBC members are enthusiastic about connecting with peers, attending events, and learning from guest speakers and one another.

What will we do?!

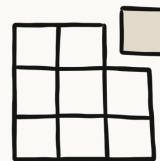

CBC Meetings

We will meet monthly to connect, share ideas and progress, get unstuck, and start new projects.

Workshops

The Anthropic team will facilitate workshops that we can join together to level-up our AI knowledge.

Hackathon

We will hold a hackathon for club members to show off their best builds!

Let's get into it!

What do you want to build this semester?

- Drop your answers in the PollEv
- Group up in the room by largest problem/solution groups and brainstorm ideas (5 mins)
- Share contacts with potential project partners (if desired)

We hope you find people with similar interests to collaborate with this semester!

5-minute paired hackathon

What can YOU build in 5-minutes?

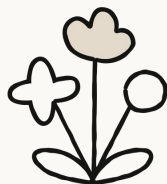

- Find a partner that you are NOT sitting next to.
- Think through the best prompt to build something useful for your semester.
- You have ONE shot to share the prompt with Claude and see what you get back!

Next steps

Important Dates

We will do so much this semester! Here are some upcoming dates to put on your calendar.

2nd CBC Meeting

Tuesday, October 21st (tentative)

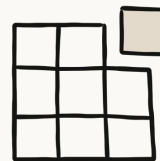

First Anthropic Workshop

“Building Agents”

Wednesday, October 1st @7PM

Location: TBD

Mini-Hackathon

November 8th (tentative)

Q&A

ANTHROPIC

**Thank you for
coming!**
